

# Buenos Aires

ARGENTINA

JUNE 3-5, 2002

On behalf of the  
*International Society of Prenatal Diagnosis*  
it is our pleasure to invite you to participate in the  
**11th INTERNATIONAL CONFERENCE ON  
PRENATAL DIAGNOSIS AND THERAPY**

The conference will provide an excellent opportunity to interact with world scientists and physicians in a multidisciplinary approach in the field of prenatal diagnosis and fetal therapy.

The scientific program aims to include the latest information for Obstetricians-Gynecologists and also for scientists interested in genetics and biochemistry related to this increasingly important field within the specialty of Fetal and Maternal Medicine.

## MAIN CONFERENCE TOPICS

The conference will include lectures with leading scientists in the following subjects related to the speciality of Fetal and Maternal Medicine and also communications and posters.

Invasive diagnostic procedures

Non-invasive screening

Preimplantation genetics

Fetal therapy

Ultrasound for common fetal defects

Prenatal diagnosis and therapy in multiple pregnancies

3-D ultrasound: myths and facts

Ultrasound and doppler issues

Molecular diagnosis

Molecular cytogenetics

Genetics in assisted reproduction

Update in fetal cells in maternal circulation

Birth defects registries and folic acid update

Endoscopic fetal diagnosis and therapy

Diagnosis and therapy of fetal infections

Psychosocial issues in prenatal diagnosis and screening

Ethical and legal dilemmas in prenatal diagnosis

Session of the "Sociedad Iberoamericana de Diagnóstico Prenatal" SIADP
